

Faculty Profile

Name	Dr. Mohan T Mathew
Email ID	mohan@sfimar.org
Designation	Adjunct faculty
Department	General management
Qualification	Masters in Economics and PhD in Economics

Brief Profile

Commenced career in economics, built on solid academic bedrock of graduation, post-graduation and a doctorate in the field obtained from reputed universities in India. My association with University of Mumbai, Tata Institute of Social Sciences and leading management schools enriched my academic experience.

The first transitional step from pure academics to industry came with a position as Deputy Director in the Indian Institute of Banking and Finance, which was followed up by a full time position within the banking industry, as a Senior Economist at the National Bank of Kuwait.

The experience in India thereafter has been ranging over a wide variety of economic areas such as capital markets (Bombay Stock exchange) industry segments (especially in solutions-seeking, as a senior member of the Indian Merchant's Chamber, in view of the practical impact on them of various policies/ regulations and governmental initiatives) and international trade and WTO (mainly through projects such as UNCTAD, DFID/UK and Government of India on Strategies and Preparedness for Trade and Globalization

in India) and FDI facilitation through a project of the European Union on Trade and Investment Development program.

My working experience with two of the big Four consulting firms –PWC and E&Y equipped me with good understanding of best business practices, process and technology.

The experience of over thirty years has been constantly supplemented with an ongoing active association with the field of teaching, as also the publication of various reports, studies, books and publications.
